RESORTSUITE EXPANDS RS OPS WITH RELEASE OF NEW GOLF STARTER APP

TORONTO, ON – ResortSuite, a leading provider of integrated guest-centric hospitality management solutions, is pleased to announce the release of their new tablet-based Golf Starter App.

The ResortSuite Golf Starter App is part of the ResortSuite OPS (Operations) framework, which uses tablet-based devices, including iOS and Android tablets, to deliver cost-effective and highly specific functional use cases. These use cases have been identified to provide operational staff the guest tools they need exactly when and where they need them — face-to-face with their guests.

Launching at HITEC 2016, the ResortSuite Golf Starter App is essential to maximizing the revenue potential of a golf operation by enabling mobility for the Golf Starter on the course. It allows the starter to view the tee sheet including player names anywhere on the course, and record start times at tee-off, allowing staff to track pace of play.

Aside from providing tee sheet information, the app also allows course marshals to view valuable player booking and arrival information and their corresponding payment status. The app can also record ad-hoc notes as golfers play through the course. The ResortSuite Golf Starter App synchronizes with the ResortSuite GOLF module for up-to-date schedules and guest preferences and alerts.

“We are thrilled to deliver yet another application to add to the growing ResortSuite OPS framework,” says Frank Pitsikalis, ResortSuite Founder and CEO. “One of the biggest opportunities for improvement in the golf industry is to provide up-to-the-minute tee sheet information while on the course. Making this process streamlined and mobile will help golf operations become more efficient and therefore improve the golfer experience.”

With the release of the ResortSuite Golf Starter App, the ResortSuite OPS web-service framework continues to grow and provide resort staff with information about guests at their fingertips, wherever they are on property. With other applications such as the ResortSuite PMS Check-In App, the ResortSuite TabletSide POS, and the ResortSuite SPA Check-in App, the ResortSuite OPS product suite is taking ResortSuite functionality mobile for quick, cost-effective and highly personalized levels of guest service.

About ResortSuite

ResortSuite is a sophisticated and fully integrated customer-centric hospitality management software solution developed specifically for hotels and resorts, boutique hotels, spas, clubs and leisure operations, and their multi-faceted business areas. The ResortSuite solution is built on an Oracle database and includes the following specialized modules: **PMS, SPA, CATERING, F&B, GOLF, SKI, CLUB, RETAIL, CONCIERGE, WEB, MOBILE, SOCIAL, DASHBOARD, CONNECT and RS OPS**. All modules oversee the areas of an operation in parallel but share common core capabilities, creating a customer-centric, integrated hospitality management solution. For more information on the ResortSuite solution, please visit www.resortsuite.com.
