

ResortSuite Announces Availability of Two New Products

Toronto, ON – December 20, 2005 - ResortSuite, developed by Enablez Inc., a leading provider of hospitality and leisure management software, announces the release of two new products, ResortSuite A/R and ResortSuite Report Scheduler, for the ResortSuite product line.

ResortSuite A/R will enable properties to track, age and report on receivables across their entire operation through a completely integrated module. The ResortSuite A/R solution also includes capabilities to set account credit limits or inactivate accounts, produce detailed invoices that itemize charges from all other departments, and generate detailed accounts receivable reports.

ResortSuite Report Scheduler will allow properties to automate external and internal communications via e-mail. For example, the scheduler can be configured to automatically send confirmation, reminder and follow-up e-mails to guests based on their reservations. The solution will also enable automated responses to informational requests and targeted marketing campaigns. In addition, the solution can automate the distribution of reports to internal users on a regular basis.

"We pride ourselves on listening to our customer's needs, and these two products are indicative of that commitment. These new modules will continue to drive down the cost of managing an operation while providing superior service to each guest", said Frank Pitsikalis, President of Enablez Inc.

About Enablez Inc.:
