

ResortSuite SPA 4.85 Released with New Market-Leading Capabilities

December 1st, 2004 - Enablez Inc., the leader in spa management software, announced today the release of ResortSuite SPA 4.85. Developed to manage day, chain, resort, destination, club, and medi spas, this enhanced version includes a group and multi-day booking function and generates several new operational reports. These new features will give owners and operators greater insight into their business and better knowledge of their guests.

The 'Quick Book' feature enables users to automatically reserve multiple services that will take place over an extended period of time. For instance, all-inclusive resort spas that offer guests a service per day may book all the services for their entire stay within seconds, providing an efficient use of available resources unachievable with manual booking. This valuable feature also allows users to book multiple guests as part of a group simultaneously. The appointments are generated, assigning available rooms and capable staff instantly.

With the addition of 20 new comprehensive reports, ResortSuite SPA 4.85 now produces over 200 reports. Owners and operators may view updated metrics on marketing analysis, inventory, and customer retention. Latest additions include the 'Spa Day Count Analysis' report, which provides a detailed snapshot of the spa's resources for the day. This report generates room occupancy, revenue per available room (RevPar), and staff utilization numbers.

"We are delighted to offer the latest release of ResortSuite SPA 4.85 to our existing clients and the entire spa industry. This new version reflects the requirements of our customers, their guests, and the evolving demands of running a successful spa business. Once again, we have brought ResortSuite SPA to the forefront of spa software technology", said Frank Pitsikalis, President of Enablez.

About Enablez:

Enablez Inc., based in Toronto, Canada, is the provider of ResortSuite, a sophisticated and fully integrated guest-centric hospitality management software solution. ResortSuite was developed specifically for hotels, resorts, inns and conference centers and their multi-faceted business areas. The ResortSuite solution was built on the Oracle database and includes the following specialized modules: PMS, SPA, CATERING, F&B, GOLF, SKI, CLUB, and RETAIL. All modules oversee the areas of an operation in parallel but share common core capabilities, creating a guest-centric, integrated management solution. Enablez prides itself on delivering exceptional support and forging strong business relationships with its clients and partners. For more information on Enablez Inc. and the ResortSuite solution, please visit www.resortsuite.com or call Voula Monos at 416-259-0715.
