ResortSuite Integrates with The Microsoft Office Suite.

Toronto, ON - March 6, 2006 - Enablez Inc., makers of ResortSuite, the leader in integrated hospitality management software, announced today its complete integration with the Microsoft Office Suite. Through its membership with the Microsoft Empower for ISVs Program, Enablez has received numerous benefits that have increased product operability for its users.

Enablez has been providing guest-centric hospitality solutions since 1999. Many of its customers have taken advantage of the support for Microsoft Windows Server 2003 Terminal Services to deploy a single ResortSuite solution for PMS, SPA, GOLF, F&B, CATERING, SKI, RETAIL, and CLUB within an easy to manage Microsoft deployment architecture.

Microsoft's ISV program has allowed Enablez to further its unique operability by creating capabilities that exploit the Microsoft suite of products. For example, the ResortSuite Automated Report Scheduler, officially launched in the fall of 2005, integrates ResortSuite reservations, confirmations, and follow-up interactions with Microsoft Outlook. ResortSuite Users are able to set up automatic correspondence with guests. Guest confirmations, reminders, and targeted e-mail marketing to targeted clients will be provided effortlessly and seamlessly.

The partnership has given ResortSuite the tools to provide ResortSuite users with the ability to export any of ResortSuite's thousands of reports to Microsoft Office Suite of products for additional analysis and publishing options.

"The Microsoft platform allows us to increase the capabilities of ResortSuite for the benefit of our clients and increase their productivity and overall satisfaction with our solution." said Frank Pitsikalis, President of Enablez.
