Introducing ResortSuite MOBILE ***Know Your Guest Now Becomes Engage Your Guest***

ResortSuite, a leading provider of integrated, guest-centric hospitality management software, is pleased to introduce ResortSuite MOBILE. The solution is a transformative addition to the guest experience supported by ResortSuite's integrated technology. It enables a guest to view all the details about a hotel, resort, club or spa, to view their individual or group itinerary and allows them to make live mobile reservations.

ResortSuite MOBILE is initially being launched on the iOS platform (iPhone, iPad and iPod Touch) and will be followed shortly on Android, Blackberry and mobile Web HTML5 devices.

The product was designed to be a highly integrated compliment to the ResortSuite system. It provides a hotel, resort, club or spa with the ability to mobilize its brand and provide its guests with the ultimate in real-time information and booking availability. In addition, it captures individual and group activities for all available amenities on a property.

"ResortSuite MOBILE places our guest-centric vision right in the palm of a guest's hand," said Frank Pitsikalis, ResortSuite Founder & CEO. "Our clients will now have the ability to offer dynamic content such as dining and spa service menus, as well as real-time access to all their guest's reservations and group events. We are leveraging the unprecedented power of mobile computing, such as the iPhone, to deliver a richer guest experience. We are extremely excited to launch this truly innovative product."
