**RESORTSUITE RELEASES TABLET-BASED F&B ORDERING APP**

**TORONTO, ON** – ResortSuite, a leading provider of integrated guest-centric hospitality management solutions, is pleased to announce the release of their new tablet-based F&B ordering app, TabletSide POS.

ResortSuite TabletSide POS is part of the ResortSuite OPS (Operations) framework, which delivers highly specific and functional use cases on cost-effective tablet-based devices including iOS and Android-based tablets. These use cases have been identified to provide operational staff the guest tools they need exactly when they need them, face-to-face with their guests.

ResortSuite TabletSide POS allows a server to take an order quickly and efficiently and have the order sent to the kitchen printers immediately for preparation. It synchronizes real-time with the full ResortSuite F&B module for up-to-date menu and guest information. It also has an automatic offline mode in situations where the WiFi may drop out in certain areas within a dining venue. The order is taken without issue and as soon as the server is within WiFi range the tablet syncs any outstanding orders to be sent or revised.

"We are excited to announce the release of the TabletSide POS app to complement our guest-centric F&B solutions," says Frank Pitsikalis, ResortSuite Founder & CEO. "This allows the F&B staff to have relevant guest information at their fingertips and quickly take orders, be it directly at the table, by the pool or even in-room and away from WiFi access".

With the release of the ResortSuite TabletSide POS app, the ResortSuite OPS web-service framework continues to strengthen. It exposes key ResortSuite functionality via many mobile and tablet devices and form-factors for quick, cost-effective and highly personalized levels of guest service. ResortSuite PMS Check-In provides curbside and in-room guest registration and check-in functionality while ResortSuite MOBILE provides separate guest-facing apps for hotel guests and club members.

**About ResortSuite:**

ResortSuite is a sophisticated and fully integrated customer-centric hospitality management software solution developed specifically for hotels and resorts, boutique hotels, spas, clubs and leisure operations, and their multi-faceted business areas. The ResortSuite solution is built on an Oracle database and includes the following specialized modules: **PMS, SPA, CATERING, F&B, GOLF, SKI, CLUB, RETAIL, CONCIERGE, and WEB.** All modules oversee the areas of an operation in parallel but share common core capabilities, creating a customer-centric, integrated hospitality management solution. ResortSuite prides itself on delivering exceptional support and forging strong business relationships with its clients and partners and was awarded *Hotelier Magazine's* 2005 Supplier of the Year Award. For more information on the ResortSuite solution, please visit [www.resortsuite.com](http://www.resortsuite.com).
